## **SUMMARY**

---

**Full-stack developer** with 4+ years of IT experience, skilled in developing complex, end-to-end solutions. Proficient in both responsive frontend (**React, Next.js**) and scalable backend (**Node.js, Express, Python, Django, SQL/NoSQL**) development. Possesses strong creative thinking, high energy, and integrity. A fast learner and effective team communicator who quickly grasps new concepts to develop innovative solutions. Always eager to learn and improve.

## **SKILLS**

---

**Front-End:** HTML5 • CSS3 • SASS • SCSS • Bootstrap • JavaScript • TypeScript • Vue • React • Next.js • Chart.js • Redux • Context API • Axios • SignalR • Pug Template • Ejs Template • Django Template

**Styling / UI:** Styled-Components • Material-UI • Tailwind • AntD • Framer Motion

**Back-End:** Node.js • Express • Django • RESTful API

**Databases / DevOps / Testing:** PostgreSQL • MongoDB • Docker • CI/CD (GitHub Actions) • Cypress

**Tools / Process:** Git • Jira • Agile • Webpack • VS Code

**Performance / SEO:** Lighthouse • Web Vitals • SEO

## **WORK EXPERIENCE**

---

**G5-Tech / Frontend Developer**

**May/2023-Present Istanbul/Turkey(Hybrid)**

- I work as a **Frontend Developer** in a company that provides software support. Built and delivered pixel-perfect and fully responsive frontend interfaces for financial consultancy platforms, including a tax refund management application; also developed corporate and event websites on time using **HTML, CSS, Javascript, React, Redux, Next.js, Tailwind, and Django Templates**.

**Cyou-Live / Frontend Developer**

**Dec/2022-May/2023 Istanbul/Turkey(Hybrid)**

- I worked as a Frontend Developer. Developed interactive and responsive UI components for education-focused web applications using **React, Vue, Next.js** (with SSR/SSG/ISR), and **Cypress** for testing; enhanced performance and user experience through efficient state management with **Context API** and Tailwind.

**Clarusway/Full Stack Developer & Mentor**

**May/2022-Present Virginia/USA(Remote)**

- Mentored junior developers in full-stack development by leading code reviews, debugging sessions, and providing project guidance. Simultaneously served as a full-stack developer on the company's internal education platform, building and maintaining scalable features using **HTML, CSS, Javascript, React, Next.js, Cypress, SQL, Django, Express.js, Docker** technologies.

## PROJECTS

---

**Müsavir Online:** Müsavir Online is designed to streamline business operations by processing all commercial invoices on behalf of businesses, generating detailed invoice reports, and enabling accurate inventory and account records. Through this platform, users can monitor real-time stock movements and prepare all necessary reports required for VAT refund applications. The system ensures that all data is meticulously processed and ready for entry. Developed with React on the frontend, it integrates seamlessly with backend systems, providing an intuitive and user-friendly interface while leveraging robust libraries for styling, form validation, notifications, and navigation. Additionally, Müsavir Online automates the invoicing processes of e-commerce businesses, enables real-time stock tracking, and facilitates comprehensive VAT refund reporting to enhance operational efficiency.

**Project Skills/Tools :** React, Redux, Material-ui library, React-router library, React-toastify library, Axios library and Django

**LegassiAi:** An application that consolidates the daily workflow of legal teams onto a single platform. It generates quick insights from documents through matter management, task/Kanban boards, calendar, contact management, and AI-powered search and summarization. It enhances productivity with real-time task/calendar synchronization, notifications, and an intuitive interface. It operates on a scalable **REST API** with a frontend built on **React + Next.js** and a backend on **Node.js + Express**, supported by modern UI components, form validation, and secure session/role management.

**Project Skills/Tools :**Next.js, Tailwind, AntDesign, Redux, ExpressJS
